

کد با خروجی:

```
type(data_pd.itertuples(index=True)) #map
```

پیمایش روی سطرها (روش دوم)

```
for index, row in data_pd.iterrows():
```

```
    print(row)
```

```
    print()
```

خروجی:

```
fname    Ali
lname    Talebi
std_num   111
Name: 0, dtype: object
```

```
fname    Arezoo
lname    Alipour
std_num   222
Name: 1, dtype: object
```

```
fname    Ramin
lname    Panahi
std_num   333
Name: 2, dtype: object
```

مرتب سازی:

```
data_pd = data_pd.sort_values(by='lname')
```

```
#data_pd.sort_values(by='lname',
```

```
inplace=True, ascending=False)
```

```
print(data_pd)
```

تفاوت loc با iloc

```
print(data_pd.loc[0])
```

```
fname    Ali
lname    Talebi
std_num   111
Name: 0, dtype: object
```

```
print(data_pd.iloc[0])
```

```
fname    Arezoo
lname    Alipour
std_num   222
Name: 1, dtype: object
```

```
for i in range(data_pd.shape[0]):
```

```
    print(data_pd.iloc[i])
```

```
import pandas as pd
```

```
data = {
```

```
    'fname':['Ali', 'Arezoo'],
```

```
    'lname':['Talebi', 'Alipour'],
```

```
    'std_num':[111, 222]
```

```
}
```

```
data_pd = pd.DataFrame(data)
```

مفهوم shape

```
print(data_pd.shape)#(2, 3)
```

```
print(data_pd.shape[0])#2
```

```
-----*
```

یادآوری اضافه کردن:

```
new_data = {'fname': 'Ramin', 'lname':
```

```
'Panahi', 'std_num': 333}
```

```
data_pd = data_pd._append(new_data,
```

```
ignore_index=True)
```

```
print(data_pd.shape)#(3, 3)
```

```
print()
```

```
print(data_pd)
```

پیمایش روی سطرها (روش اول)

```
for row in data_pd.itertuples(index=True):
```

```
    print(f"Index: {row.Index}")
```

```
    print(row)
```

```
    print()
```

خروجی

```
Index: 1
```

```
Pandas(Index=1, fname='Arezoo', lname='Alipour',
std_num=222)
```

```
Index: 2
```

```
Pandas(Index=2, fname='Ramin', lname='Panahi',
std_num=333)
```

```
Index: 0
```

```
Pandas(Index=0, fname='Ali', lname='Talebi',
std_num=111)
```
